Can somebody please mail me the details of how 7PLUS works??
(encoding, decoding and "commands" at the start/end of encoded file)

I want to write my own 7Plus de/encoder

Please mail: jjjbokma@cs.ruu.nl

Thanks in Advance

John

What system? I tried w2xo.pgh.pa.us and got nowhere.

I have had several requests for ftp of my bbs for Unix.

You will find it in ftp/pub/hambbs in the file "xobbs60.tar".

To: packet-radio@ucsd.edu

Folks,

Having gotten my feet wet with KA9Q in a DOS environment, for some unexplicable reason I should like to have a go at a VAX version. Does such a thing exist?

Any pointers / helpful suggestions welcomed.

>that it is an eprom for the kam. But what does it do? Who wrote it?
>Where is the documentation? who has the source? why would I use it?

>

>73,

>stuart

Stuart, *IF* in fact it is the 6.0 eprom for the kam, its the Pactor upgrade. It has all the same packet upgrades as the 5.0, 5.01, and 5.02 does, but it adds the Pactor mode for the HF port. If u buy it from Kantronics

they also include the Hostmaster 2 Plus program *UPGRADE*, not the program mind u, but an upgrade that is SPECIFICALLY mated with the eprom. In other words, with the eprom and any terminal program, u will still be able to run pactor, but with the correct eprom and copy of hm2plus, you will be able to use the pactor drop-down menu on the prog.

Hope this helps some.

Subject: NOS under Coherent

To: packet-radio@ucsd.edu

I am trying to get a TCP/IP station running under the Coherent OS. I tried Randy Wright's port of an older version of NOS, but it is not stable with the AX25 stuff (he only worked on the SLIP stuff). Also, the mailer wasn't sorted out yet. I found the k5jb software on ucsd.edu the other day, and that appears to have been ported. Any other suggestions?

I am a college student with too many classes, so I don't have lots of time to test every port that comes along; otherwise I would probalby port something like j-nos or w-nos.

Thanks for the advice,

Ken Friberg n8pbe

To: packet-radio@ucsd.edu

For those that would like to FTP my PacketTracker for the Macintosh
it is located at

dorm.rutgers.edu:~ftp/pub/hamradio/Mac/PacketTrackerV1.04.hqx.

If anyone wants to put it other places, please do, and I would like
someone who uses CompuServe and/or America OnLine to put it up there
as well. If you do, drop me note so that I know it has been done.

Thanks

Subject: TCP/IP information for a beginner!
To: packet-radio@ucsd.edu

I read the FAQ but that only gave an overview of TCP/IP. What I need to know
is this:

- (a) Can I get software/hardware for my PK-232mbx & PC?
- (b) Who do I need to ask to get allocated an address and be added to the
name servers?
- (c) Is it worth bothering with anything less than 9600 baud?

Thanks if you can help.

Ian.

Greetings,

One of my bbs users found a not quite complete hardcopy of a document he described as "TCP/IP Users Guide for Beginners, V2.0, by N6GF". Does this sound familiar to anyone and if so, where can I pull it off of the Internet?

Thanks in advance.....
